

## Co-inform

**Co-Inform is a EU-funded project involving top universities and SMEs in 7 European countries.**

*The objective is to create tools to foster critical thinking and digital literacy for a better-informed society. These tools will be designed and tested with policymakers, journalists, and citizens in 3 different EU countries.*

## Why

Misinformation online generates misperceptions. The speed and ease in which false news spread on social media have a massive impact on current affairs and policies. By bringing together a multidisciplinary team of researchers and experts in computer science, behavioural science, and sociology, Co-Inform aims to engage all stakeholders in fighting misinformation by providing them with tools to identify 'fake news' online, understand how they spread, and obtain access to verified information.
